Asset Manager	Tokyo Realty Investment Management Inc. (abbreviated as TRIM)
Sponsors (shareholding ratio)	Tokyo Tatemono (52%) Yasuda Real Estate (18%) Taisei Corporation (10%) Sompo Japan Nipponkoa Insurance (10%) Meiji Yasuda Life Insurance (10%)

Characteristics of JPR

1 A track record of stable management for over 17 years

Since listing, JPR has steadily expanded its asset size while enhancing the quality of its portfolio.

2 A portfolio focused on office properties in Tokyo

JPR has established a portfolio that is focused on office properties in Tokyo, which feature growth potential, with urban retail properties and office properties in regional cities to complement profitability.

3 Superiority of a developer-sponsored REIT

JPR has exerted its superiority of a developer-sponsored REIT to acquire properties having excellent location characteristics centering on large-scale development projects.

4 Continuous internal growth through high occupancy rate and upward revision of rents

The average occupancy rate of the entire portfolio has stayed at 97% or higher since the 26th fiscal period ended December 2014, and upward revision of rents continued to surpass downward revision by value for 11 straight fiscal periods.

5 Establishment of a financial base that is stable over the long term

With a credit rating of AA- (Stable), JPR has established a financial base centering on long-term, fixed-interest rate debts with a focus on stability.

(assumption as of March 2020)

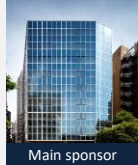

1. Each of the figures for "number of properties / asset size," "ratio by asset," "(planned) acquisition price and ratio of properties from sponsor pipelines," "LTV" and "ratio of long-term, fixed interest rate debts" is an estimated figure as of March 31, 2020.

2. Properties from sponsor pipelines refer to properties acquired from sponsors, etc. and properties acquired based on information provided by sponsors. Sponsors, etc. represent the five sponsor companies of JPR, their affiliated companies and special purpose companies (SPCs) in which the sponsors have made equity investment. Ratio of properties from sponsor pipelines refers to the ratio of (planned) acquisition price of properties from sponsor pipelines over the total (planned) acquisition price of the entire portfolio.

Distribution per unit has continued to increase steadily over a long period of time.
 Existing target of 7,500 yen is expected to be reached in Jun. '20 period
 Set new target of 7,800 yen and aim for further growth

[Growth policy] Stable growth of cash distributions/ Disciplined expansion of asset size /
 Further improvement of portfolio quality

■ Results and Medium-Term Target of Distribution per Unit

1. Distribution per unit as medium-term target is a management target set by TRIM, and there is no guarantee that the figure is achieved.

Simulation of DPU Growth

■ Target contributions to distributions of each growth driver

Growth drivers		Contribution to distributions (per unit)
Internal growth	1% growth in rents and common charges (per annual rate) * Assuming that balance of rents and common charges grew at annualized rate of 1% in Dec. '19 period	Around 67 yen
External growth	Assuming acquisition of 10 billion yen property with after depreciation yield of 3.3% (not including financing costs)	Around 172 yen
Financial strategy	0.01% reduction in average cost of debt (per period) * Result of most recent year was reduction of 0.05% per period	Around 9 yen

■ Other major factors that affect DPU

- Increase or decrease in incidental income such as land rent and parking lot income
- Increase in management expenses
- Balance of utilities expenses
- Increase in property taxes and other property costs
- Increase or decrease in repairs and maintenance and depreciation

■ Estimated increase in DPU as a result of property acquisition

	20	313	323	333	344	354	365	375

1. The above figures are TRIM's estimates of the impact of various measures on performance based on certain assumptions and TRIM makes no guarantee whatsoever concerning the achievability of the figures or the amounts and timings
 2. Contribution to distributions is the estimated increase in distributions over the period based on various assumptions divided by the number of investment units outstanding at the end of Mar. 2020.
 3. "Estimated increases in DPU as a result of property acquisition" does not include financing cost.

Plans for the fiscal period ended December 2019 progressed steadily thanks to a buoyant office property leasing market.

At the beginning of 2020, JPR undertook the public offering of new investment units for the first time in the last three years to fund property acquisition.

Occupancy Rate

Average rent free period

1. Occupancy rate based on concluded contracts and occupancy rate based on generated rents represent period-average figures.
 2. The figures for the occupancy rate based on concluded contracts and the occupancy rate based on generated rents for the 37th fiscal period (Jun. '20) are estimates that reflect consents regarding move-ins and move-outs that will become effective in the fiscal period. The respective figures for the 38th fiscal period (Dec. '20) are estimates based on assumptions by JPR regarding move-ins and move-outs becoming effective in the fiscal period.

1. Figures in "Rent Revisions" are values excluding the land rent of the Otemachi Tower (Land with Leasehold Interest).

With rents still being revised upward, the gap in rents will widen further due to solid demand.

Status of Gap in Rent (Office)

Percentages of space by the time of contract renewal

Ratio of change in upward revision

Status of Average Rent (existing office properties, all area)

Change in Average Rents by Area (existing office properties)

1. "Market rent" and "Market range" refers to rent level set by TRIM for office buildings held by JPR based on assessment of CBRE Inc. and advice from Tokyo Tatemono.

1. "Existing office properties" refer to properties held continuously since the Dec. '16 period.
2. Average rent indicates the assumed average rent at full occupancy.

On top of measures to achieve continuous raising of rents and effective value enhancement, energetically endeavor to reduce expenses

Basic Strategy

1. Strategically utilize target rents

Set target rents, the target for raising rents for new contracts and contract renewals, for respective office properties. By clarifying the target, aim to conduct strategic negotiations for raising rents and maximizing rents upon tenant replacement

2. Reinforce investments for value enhancement

In addition to reinforcing property competitiveness, proactively invest in interior fittings and facilities, etc. that meets tenant needs, with an intention to raise rents for new contracts

3. Continuously enhance tenant satisfaction

Deliberately responding to tenants and creating safe and secured environments are important initiatives that positively affect rent negotiations as well as help prevent contract cancellations from happening

4. Increase NOI by reviewing property management and operation methods

Review property management and operation methods while paying attention to maintaining and improving the management quality, in an effort to promote reduction of rental expenses and increasing incidental revenues

- Has strengthened risk resilience by continuously responding to risks based on risk response scheme
- When managing information, implements safety measures to address various threats and develops contingency plans in case of failure, etc.

Results of the 36th fiscal period ended December 2019

DPU: 7,493 yen (up 113 yen, period-on-period)

Rent revenue continued to increase, reflecting steady progress in attracting new tenants and revising rents upward.

Cash distributions increased for the 12th consecutive fiscal period, partly attributable to the asset replacement implemented in the previous fiscal period.

Rental revenue

- ① [Rents and common charge] Increase (up 1.2% from the previous period) due to full-year contribution of tenants that moved in in the previous period and upward revision of rents
- ② [Land rent] Revision of land rent of Otemachi Tower (land with leasehold interest) boosted revenue throughout period.
- ③ [Incidental income] Increased mainly due to seasonal factors

Expenses related to rent business

- ④ [Utilities expense] Decreased mainly due to seasonal factors and the balance of utilities expenses improved +26 million yen)
- ⑤ [Other expenses related to rent business] Brokerage fees, etc. increased

Non-operating income and expenses

- ⑥ [Nonoperating income] Likely to decrease in the absence of settlement on management association accounts (mainly recorded in the June period every year)
- ⑦ [Non-operating expenses] Financial costs such as interest expense on loans and investment corporation bonds decreased

*1 Increase/decrease as a result of asset replacement in the 35th fiscal period is calculated.

Rental revenue

- ① [Rents and common charge] Increased, mainly attributable to new tenants moving in and rises in sales-linked rent in commercial properties. Since lost rent, etc. due to agreement cancellation was received as a penalty for cancellation, the net increase ((i)+(i)') was approximately 62 million yen.

Expenses related to rent business

- ② [Repair and maintenance cost] Increased largely due to the occurrence of construction work to restore properties to their original condition
- ③ [Property management fees] Fees for upward revisions of rent increased due to progress with rent revisions
- ④ [Other expenses related to rent business] Increased in brokerage fees, etc.

Forecast of the 37th fiscal period ending June 2020

DPU: 7,590 yen (up 97 yen from 36th period (Dec. '19) forecast)

Contribution from both internal and external growth

The medium-term DPU target of 7,500 yen is expected to be reached, absorbing the dilutive effect of the issuance of new investment units.

Forecast of the 38th fiscal period ending December 2020

DPU: 7,720 yen (up 130 yen from 37th period (Jun. '20) forecast)

Cash distributions are expected to continue increasing, thanks to the full-year contribution of the properties acquired in the previous fiscal period.

With an eye on a new medium-term goal, aim for stable growth through the continuous upward revision of rents and cost control.

An Increase in Unrealized Gains

- Unrealized gains expanded to 108.1 billion yen due to an increase in appraisal value
- Appraisal value increased for 50 properties with direct cap rate falling for 48 properties (out of 63 properties in total)

Appraisal value	Unrealized gains	Ratio of unrealized gains
522.6 billion yen (up 13.5 billion yen from 35th period (Jun. '19))	108.1 billion yen (up 13.9 billion yen from 35th period (Jun. '19))	26.1% (up 3.4% pt from 35th period (Jun. '19))

(Changes in unrealized gains and losses)

Factors of Change in Appraisal Value

(Changes in direct cap rate)

- Decreased by 1.2 percentage points from the 17th period ended June 2010 (4.8%), the peak period for office properties in Central Tokyo

1. The changes in direct cap rate indicate the figures for the 47 properties JPR has owned since the end of June 2009 for the "Entire portfolio," and for the 15 properties JPR owns since the date for "Office properties in Central Tokyo," respectively.

(Breakdown of unrealized gains and losses)

- Amounts of both unrealized gains and unrealized losses improved from the end of the 35th period (Jun. '19).

Net Increase in Leasable Floor Area, Strong Demand and Impact on Vacancy Rate

■ Changes in New Supply/Demand Area, Leasable Floor Area and Vacancy Rate (Tokyo CBDs)

1. Actual results of the vacancy rate, leasable floor area and occupied area through December 2019 are based on the Office Report (Tokyo CBDs) by Miki Shoji Co., Ltd. New supply, new demand and loss areas as well as the leasable floor area and vacancy rate in 2020 and thereafter have been estimated based on surveys and simulations conducted by market research agency and TRIM.
As an assumption for the simulation, the new supply area uses an estimate obtained by applying a certain multiplying factor to the average of the past results. The lost area is based on the average of the past results as assumption.

■ Changes in the average rent of the 23 wards of Tokyo

1. Prepared by TRIM based on the statistics data published by Sanko Estate Co., Ltd. and NLI Research Institute.
2. Please refer to glossary for definition of building classes.

■ Comparison of employed population and occupied area ('05=100pt)

1. The employed population was prepared by TRIM based on the Labor Force Survey, the Ministry of Internal Affairs and Communications.

Cap Rate of Tokyo Office Properties Continues Low Level

1. Prepared by TRIM based on the Japanese real estate investor survey publicized Japan Real Estate Institute.

5. Glossary

Term	Meaning
Rent	The rents stated in this report include common charges.
Asset size	The asset size refers to the total amount of the acquisition prices of the owned properties.
Investment ratio	The investment ratio refers to the ratio of the acquisition price of relevant properties owned by JPR to the total acquisition price of its portfolio.
Occupancy rate / occupancy rate based on concluded contracts	Total leased space / total leasable space When simply stated as occupancy rate, it represents the occupancy rate based on concluded contracts. When occupancy rate for each fiscal period is indicated, it represents the average occupancy rate as of the end of each month that belongs to the relevant fiscal period (period average of occupancy rate at end of month). Furthermore, it may be described as “average occupancy rate” in order to distinguish it from “period-end occupancy rate.”
Occupancy rate based on generated rents	(Total leased space – total leased space during rent-free periods) / total leasable space
Average unit rent	Total monthly rent / total leased space Calculated based on the monthly rents (including common charges) indicated in the lease contracts with tenants; for certain properties, the figure includes common charges, etc. received by master lessees without being recorded as JPR’s revenue
Average downtime	The average period of vacancy between the move-in dates stipulated in the new lease contracts becoming effective in each fiscal period and the move-out days of the previous tenants for the same leased spaces.
Average rent-free period	The average of the rent-free periods agreed upon in new lease contracts becoming effective in each fiscal period.
Revised amount of monthly rent	Revised amount of monthly rent indicates the sum total (including common charges) of monthly rent after revision minus monthly rent before revision upon contract renewal with rent revision in each fiscal period. For the revised amount of monthly rent for the 36th fiscal period (Jun. '20), the amount of increase is an estimate based on consents regarding rents becoming effective in the fiscal period, and the amount of decrease is an estimate assumed for the rents becoming effective in the fiscal period.
Change amount in monthly rent upon tenant replacement	Change amount in monthly rent upon tenant replacement indicates the sum total (including common charges) of monthly rent after tenant replacement minus monthly rent before tenant replacement in each fiscal period. The change amount of monthly rent upon tenant replacement for the 36th fiscal period (Jun. '20) is an estimate based on consents regarding move-ins/move-outs and rents becoming effective in the fiscal period.
Target rent	Target rent refers to the rent level (the highest limit) TRIM sets for each fiscal period as the target for inviting new tenants and revising rents for existing tenants, and are set at roughly the same level as the highest limit of market rent.
Base rent	Base rent refers to the rent level (the lowest limit) TRIM sets for each fiscal period as the base for inviting new tenants and revising rents for existing tenants, and are set at roughly the same level as market rent.
Rent gap in real terms	The rent gap in real terms for a month refers to, in lease contracts due for renewal during the four periods from the period ending in June 2020, the ratio obtained by subtracting the total difference between the upper limit of rent in the market range and the existing reference rent that is lower than the upper limit of rent in the market range from the total difference between the market range rent and the existing rent (excluding new contracts, etc.) that exceeds the market range rent and dividing that monthly difference by the monthly rent for the month in question.

Term	Meaning
Rent gap	The rent gap for a month refers to, in lease contracts due for renewal during the four periods from the period ending in June 2020, the ratio obtained by subtracting the total difference between the lower limit of rent in the market range and the existing rent that is lower than the lower limit of rent in the market range from the total difference between the upper limit of rent in the market range and the existing rent (excluding new contracts, etc.) that exceeds the upper limit of rent in the market range and dividing that monthly difference by the monthly rent for the month in question.
NOI yield	(Rental revenue - real estate - expenses related to rent business + depreciation) / book value (or acquisition price, depending on the case) NOI yield is calculated using the above formula, by dividing the book value (or acquisition price) in the formula by 365 days and multiplying it by the number of business days of the relevant fiscal period.
After-depreciation yield	(Rental revenue - real estate - expenses related to rent business) / book value (or acquisition price, depending on the case)
Number of tenants	The number of tenants counts the parties with whom JPR has concluded lease contracts for the building floors. When a single tenant leases multiple rooms, it is counted as one if the tenant uses the same property. If the leased rooms are in multiple buildings, the tenant is counted in plural.
Ratio of long-term, fixed interest rate debts	Long-term interest-bearing debts with fixed interests / total interest-bearing debts
Average maturity	Weighted average calculated by dividing the remaining periods to the repayment dates and redemption dates of borrowings and investment corporation bonds at the end of each fiscal period by the balance of respective borrowings and investment corporation bonds at the end of each fiscal period For borrowings with scheduled repayment in installments, the weighted average of the remaining period to the scheduled repayment dates of each installment payment in accordance with the relevant repayment amount
Average debt cost	Weighted average calculated by dividing the remaining periods to the repayment dates and redemption dates of borrowings and investment corporation bonds at the end of each fiscal period by the balance of respective borrowings and investment corporation bonds at the end of each fiscal period For borrowings with scheduled repayment in installments, the weighted average of the remaining period to the scheduled repayment dates of each installment payment in accordance with the relevant repayment amount
LTV	Interest-bearing debts / total assets at end of period (based on total assets) There are other calculation methods of LTV. • LTV based on unitholders’ capital) = Interest-bearing debts / (interest-bearing debts + unitholders’ capital) • LTV (based on valuation) = Interest-bearing debts / (total assets at end of period + unrealized gains or losses from valuation) Unrealized gains or losses from valuation refer to the difference between appraisal value and book value.
NAV per unit	(Unitholders’ value + reserve for reduction entry, etc. + unrealized gains or losses) / number of units outstanding
Ratio of unrealized gains or losses	(Appraisal value – book value) / book value
Cap rate	Capitalization rate by the direct capitalization method Direct capitalization method is one of the methods to calculate the value estimated by income approach (a method to estimate the value of the target property by calculating the sum total of present value of the net operating income which the target property is expected to generate in the future), and capitalizes the net operating income of a certain period by using the capitalization rate.
Tokyo/ Other cities	“Tokyo” defined by JPR as its investment area collectively refers to “Central Tokyo” and “Greater Tokyo” as defined below, and “Other Cities” refers to other regions. • Central Tokyo: Chiyoda, Chuo, Minato, Shinjuku, Shinagawa and Shibuya Wards • Greater Tokyo: All other areas of Tokyo Prefecture, and Chiba, Kanagawa and Saitama Prefectures
